

PRESS RELEASE:

PowerFolder now assisting Aerospace

A U.S. Manufacturer of specialized sensors, including those used on the Mars Probe “Curiosity”, successfully synchronizes data globally and securely using PowerFolder.

Hampton/Meerbusch. The software company from Meerbusch now supplies one of the most innovative companies in the United States. Measurement Specialties, Inc (NASDAQ: MEAS) is the only manufacturer of sensors with certification from both the US NASA and also the European Space Agency ESA. Sensors that travel in space or even to Mars – designed and produced by employees trusting PowerFolder.

Publicly traded MEAS not only provides its products to the aerospace sector but is also a leading supplier to the defense, automotive and health industry.

The modern and future-oriented research, development and production of sensors is a highly sensitive process where data must not fall into the wrong hands. With its approximately 2400 employees across dozens of offices in different countries and on different continents, MEAS needs to ensure that data can be exchanged safe and secure.

Bob Andreini, Global Director of Information Security and Information Technology, Measurement Specialties: “PowerFolder ensures that our data is available to our employees’ worldwide, safe and efficiently. The efficient encryption of data transfer allows transfer over public networks; our MPLS network resources are not strained.”

Christian Sprajc, CEO PowerFolder: “MEAS as globally operating and publicly traded corporation selecting PowerFolder is yet another confirmation of the viability of our solution. The highly sensitive data of MEAS require special protection, this is guaranteed with PowerFolder.”
